TECHNOLOGIES Next.js, React, TypeScript, JavaScript, Tailwind CSS, Node.js, Express, PostgreSQL, SQLite, Prisma, Supabase, Python, REST APIs, Vercel, and Cloudflare R2.

SELECTED PROJECTS

Founder / Developer | BrandHive Studio | May 2026 – Present

- Founded a creative and technology studio delivering digital, web, and AI-enabled business solutions.

HIVE AI – Business AI Assistant | BrandHive Studio | Project

- Developed a website-integrated AI assistant connected to structured business knowledge, including services, packages, add-ons, and FAQs. Designed for conversational service enquiries; knowledge accuracy and broader multilingual behavior remain under improvement.

UZEE TECH ScreenGuard Finder | UZEE TECH | Project

- Built a web-based compatibility finder backed by a structured device/model dataset. Live: finder.uzeetech.com.lk

Muthuwadige Hardware ERP | Client Project | Project

- Contributed to an offline-first, hybrid POS/ERP system with local and cloud components.

Hive Trading Automation V2 | Independent Project | In Development

- Built a paper-trading market-scanning system for Binance Spot with risk controls and dashboard monitoring. Runs in paper mode; live trading is disabled. No real-money performance is claimed.

BrandHive WhatsApp AI Agent | BrandHive Studio | Project

- Developed a WhatsApp-based AI agent supported by structured business data. Private customer conversations and chat screenshots are excluded.
